GENERAL NOTES:

- These documents outline the general character and quality of the work and extent of its details. They are intended to be considered in conjunction with the plans and specifications and shall not be construed to constitute a contract. The Contractor shall be responsible for ensuring that any changes to the work are made in accordance with the plans and specifications and shall be responsible for obtaining the necessary permits and approvals from the appropriate authorities.
- The Contractor shall be in accordance with the British Columbia Building Code 2018 Edition. Every effort will be made to ensure that any changes to the work are made in accordance with the plans and specifications and shall be responsible for obtaining the necessary permits and approvals from the appropriate authorities.
- A 44 inch steel reinforcement bar shall be used in all concrete walls and foundations.
4. Prior to commencing construction, the Contractor must verify all dimensions, level of construction, and the Contractor's acceptance of the contract documents.
5. The Contractor shall be responsible for obtaining all necessary permits and approvals from the appropriate authorities and shall be responsible for ensuring that the work is completed in accordance with the plans and specifications.
6. The Contractor shall be responsible for ensuring that the work is completed in accordance with the plans and specifications and shall be responsible for obtaining the necessary permits and approvals from the appropriate authorities.
7. The Contractor shall be responsible for ensuring that the work is completed in accordance with the plans and specifications and shall be responsible for obtaining the necessary permits and approvals from the appropriate authorities.
8. The Contractor shall be responsible for ensuring that the work is completed in accordance with the plans and specifications and shall be responsible for obtaining the necessary permits and approvals from the appropriate authorities.
9. The Contractor shall be responsible for ensuring that the work is completed in accordance with the plans and specifications and shall be responsible for obtaining the necessary permits and approvals from the appropriate authorities.
10. The Contractor shall be responsible for ensuring that the work is completed in accordance with the plans and specifications and shall be responsible for obtaining the necessary permits and approvals from the appropriate authorities.

CONSTRUCTION NOTES:

1. Exterior walls to include: 2x6 studs at 24" o.c.
2. 2x6 studs and 2x6 studs to be installed in concrete.
3. 2x6 studs and 2x6 studs to be installed in concrete.
4. 2x6 studs and 2x6 studs to be installed in concrete.
5. 2x6 studs and 2x6 studs to be installed in concrete.
6. 2x6 studs and 2x6 studs to be installed in concrete.
7. 2x6 studs and 2x6 studs to be installed in concrete.
8. 2x6 studs and 2x6 studs to be installed in concrete.
9. 2x6 studs and 2x6 studs to be installed in concrete.
10. 2x6 studs and 2x6 studs to be installed in concrete.

General Foundation Notes:

1. All walls to be in accordance with Structural Drawings and Specifications.
2. Footings and foundation walls indicated on the drawings are generic. The Contractor is responsible for testing the soil and ensuring adequacy of the structure.
3. All concrete to be minimum 3,000 psi (28 day) conforming to C.S.A. A23.1.
4. All concrete to be minimum 3,000 psi (28 day) conforming to C.S.A. A23.1.
5. All concrete to be minimum 3,000 psi (28 day) conforming to C.S.A. A23.1.
6. All concrete to be minimum 3,000 psi (28 day) conforming to C.S.A. A23.1.
7. All concrete to be minimum 3,000 psi (28 day) conforming to C.S.A. A23.1.
8. All concrete to be minimum 3,000 psi (28 day) conforming to C.S.A. A23.1.
9. All concrete to be minimum 3,000 psi (28 day) conforming to C.S.A. A23.1.
10. All concrete to be minimum 3,000 psi (28 day) conforming to C.S.A. A23.1.
